

BALLISTIC STORM SHELTERS

Structurally Engineered & Tested.

Certified in All 50 States. Patents Pending. "Real Protection" Against Tornadoes, Earthquakes, Hurricanes, & Active Shooters

In addition to wind and seismic loads, the shelters are capable of supporting substantial vertical loads that may result from the collapse of the surrounding building, debris, or other sources.

The 6 and 8-sided models are capable of supporting at least 750 pounds per square foot vertical load spread over the roof or at least a 6000 pound concentrated load. The 10, 12, and 14-sided models are capable of supporting at least 500 pounds per square foot or at least a 5000 pound concentrated load.

Fully finished Ballistic Storm Shelters can be installed in almost any indoor or outdoor location in one day

Off-Grid Wind Turbine: 600 watt Home Wind Generator

- Generates 60% more effective power than other wind turbines with the same rotor diameter.
- 10% more efficiency, lower starting resistance, class H motor insulation rating.
- Temperature resistant, high strength, and able to handle a variety of wind conditions.
- Efficient, Sustainable, Compact, Portable, and easy to set up.

Jars of Life

Jars of Life provide preppers with all they need to survive in one package. Available in the following variants:

- Fire
- Water
- Power
- First Aid
